

25X1A [REDACTED] 3554-62

21 September 1962

**MEMORANDUM FOR: Assistant Director,
Office of Special Activities**

SUBJECT: Report of Trip to [REDACTED] 25X1A

25X1A

1. Reference is made to subject trip report, submitted by [REDACTED] on 18 September.

2. The concept of putting the second [REDACTED] gear in a B-57D rather than a B-47 is intriguing, provided the additional altitude changes the stand off distance enough to make it operationally useful against a considerable extra number of TALL KING radars. It is requested that OSA review the additional capability that would be obtained by this suggestion and an estimate as to the cost and complexity of carrying it out. This would, essentially, leave us with two power measuring aircraft of different types. It is conceivable that our attempt to survey the periphery of Russia may be a fairly major undertaking and two aircraft are required in order to complete that survey and keep it up to date. 25X1A

3. Your comments on this suggesting are requested by 12 October 1962.
